

Rupesh Pithva

Technical Project Manager | Delivery Lead | Web3 SME | Cloud & DevOps | Open Source Advocate

ABOUT ME

- **Results-driven Technical Project Manager and Web3 Architect** with 20+ years of experience in software architecture, design, development, and performance tuning across BFSI, Supply Chain, and Telecom domains.
- Skilled in delivering scalable, high-availability EAI solutions and managing global offshore delivery models.
- 6+ years of specialized expertise in Web3 and blockchain technologies (Corda, Quorum, Ethereum, Hedera, Hyperledger Indy) combined with strong cloud platform experience (Azure, AWS).
- Deep expertise in IT strategy, governance, solution architecture, quality control, and Agile methodologies.
- Passionate advocate for the Web3 ecosystem, driving innovative and efficient blockchain architectures across diverse industry domains.

KEY ACHIEVEMENTS

- **Central Bank of Saudi Arabia:** Delivered a real-time cross-border CBDC transfer solution connecting 4 central banks.
- **Quality of Trust POC, Telecom:** Architected a blockchain/AI-ML spam detection platform, driving a 70% improvement in detection accuracy.
- **Sustainable Supply Chain Solution:** Delivered \$25M+ in annualized savings and a 20% improvement in operational efficiency for a global enterprise client.
- **Digital Identity Solution, Banking:** Digitized identity credential management, cutting time-to-delivery for banking services by 50%.
- **CBDC Projects Leadership:** Led POC implementation for wholesale and retail CBDC transfer platforms.

EXPERIENCE

The Hashgraph Group — *Engineering Lead*

Dec 2025 – Present

Accenture, Pune — *Technology Architect & Delivery Manager*

April 2022 – December 2025

Wipro Ltd, Pune — *Solution Architect*

July 2015 – April 2022

Impetus Infotech (India) Pvt Ltd, Indore — *Lead Software Engineer*

July 2005 – July 2015

EDUCATION

B.E. in Computer Science

Faculty of Technology and Engineering, Maharaja Sayajirao University, Vadodara | 2001 – 2005

Higher Secondary (Science) Sardar Vinay Mandir, Vadodara | 1999 – 2001

PERSONAL DETAILS

Mobile: +91 93704 44233

Email: rupesh.pithva@gmail.com

LinkedIn: [linkedin.com/in/rupesh-pithva](https://www.linkedin.com/in/rupesh-pithva)

Location: Pune, India

SKILLS

Database

Oracle 9i/10g/11g/12c, MongoDB, MS SQL, MySQL, PostgreSQL, Cosmos DB

Languages & Frameworks

Java, Node.js, Spring (Boot, Core, Security), REST APIs, Solidity, Shell Script, PowerShell, Python

Blockchain Platforms

Quorum, Corda, Ethereum, Web3.js, Truffle, DAML, Hedera, IPFS, Digital Identity, Tokenomics (conceptual)

Cloud & DevOps

AWS, Azure (AKS, App Services, Functions), Terraform, Ansible, Azure DevOps, Jenkins, GitHub Actions

Containers & Infrastructure

Docker, Kubernetes (AKS), Unix/Linux, Oracle WebLogic, Jboss

Other Tools & Platforms

Oracle SOA Suite 11g, CEP, BAM, BPML, J2EE, XML/XSLT, UML

AWARDS

- Outstanding Employee Award — Impetus, 2008
- Long Association Award — Impetus, 2015
- 5th Rank, Vadodara City — SSC Exam (GSEB)
- 9th Rank, Vadodara City — HSC Exam (GSEB)

CERTIFICATIONS

- Oracle SOA Suite 11g — 2015
- R3 Corda Certified Developer — 2020
- DAML Associate — 2021

LANGUAGES

English, Hindi, Gujarati

SELECTED PROJECT DETAILS

Track and Trace | Teleport, Malaysia

Technical Architect and Delivery Lead | May 2026 – Present

Tech: Next.js, Java, PostgreSQL, Hedera (HCS), Digital Identity, AWS

- Architected a core cargo-traceability MVP, spearheading the end-to-end architecture and delivery of a cargo-tracking solution to validate real-time shipment visibility and data accuracy.
- Engineered a decentralized trust architecture using Hedera Consensus Service (HCS) and Digital Identity (DIDs), delivering a tamper-proof audit trail proof-of-concept.
- Guided the technical delivery lifecycle, leading the engineering team from system design through pilot implementation, and defining technical standards, core schemas, and delivery milestones.

Membership Portal (MP) | Hedera/Hashgraph Ecosystem

Technical Architect and Delivery Lead | Jan 2026 – May 2026

Tech: Next.js, Strapi, PostgreSQL (AWS RDS), Hedera (HCS), Digital Identity, AWS, Redis, K6

- Served as delivery lead and technical architect for core platform modules — Quests, Member Directory, News Feed, Learning Module integration, and Events Calendar.
- Led delivery of the Membership Portal, driving performance engineering (query optimization, connection pool tuning, RDS right-sizing, Istio load stabilization) and security hardening (remediation of critical auth-bypass, RBAC, and injection vulnerabilities) across DevOps and Development teams.
- Designed an AWS SES email migration (SQS/SNS-based queuing with DLQ and bounce handling), replacing the legacy Outlook SMTP setup.
- Led the redesign of the platform's password encryption architecture, closing a key-compromise risk in the existing scheme.
- Established Jira-based delivery workflows to structure and track technical work across teams.

CBDC Cross-Border Platform | Central Bank, Middle East

Technical Project Manager | Jan 2025 – Dec 2025

Tech: Node.js, MySQL, Quorum, AWS (Terraform, EC2, Networking, ALB, WAF, RDS)

- Led a team of infrastructure architects to design secure blockchain infrastructure and deploy a cross-border CBDC platform on a private cloud.
- Collaborated with Web3 technology teams across multiple central banks to deliver end-to-end integration.
- Defined blockchain security controls spanning identity and access management, key management, data privacy, and secure communication.
- Supported the client's technical assessment of the platform to inform their Go/No-Go decision.

Quality of Trust using Blockchain/AI-ML | TM Forum

Web3 Architect | Aug 2024 – Jan 2025

- Led a cross-company team of Web3 architects to design a spam-detection platform for telecom service providers using blockchain and AI/ML.
- Delivered a 70% improvement in spam detection accuracy.
- Showcased the POC at the DTW 2025 event hosted by TM Forum in Copenhagen.

Sustainable Blockchain Supply Chain | US Tech Giant

Technical Project Manager | Apr 2022 – Jun 2024

Tech: Node.js, Azure (AKS, App Services, Function Apps, Networking, DevOps), Quorum, IPFS, Solidity

- Designed and deployed a production-grade sustainable supply chain track-and-trace platform, scaled to support 25 consortium members.
- Delivered \$25M+ in annualized financial savings for the client through accurate invoice and rebate reconciliation, improved productivity in recalls and returns, and reduced component leakage via serialized tracking.
- Enabled a 15–20% reduction in operating costs for consortium partners through automated reconciliations and real-time location visibility during recalls and returns.
- Deployed the blockchain solution in a secured, containerized private-cloud environment with automated CI/CD pipelines, cutting environment creation time from 3 days to 4 hours.
- Implemented a secure blockchain platform covering identity and access management, key management, data privacy, secure communication, and transaction endorsement.
- Owned release management, client management, and team management for the engagement.

Self-Sovereign Identity Platform | Bank, South Africa

Technical Project Manager | Oct 2021 – Mar 2022

Tech: Java, Spring Boot, Hyperledger Indy, AWS

- Designed and delivered a digital identity platform enabling invocation, revocation, and verification of digital identities for bank services.
- Achieved a 50% improvement in operational efficiency for banking service delivery while strengthening counterfeit-prevention measures.
- Delivered the full solution — web application, blockchain-based middleware, and data store — within 6 months.

Blockchain/Web3 POCs & Regulatory Solutions | Wipro Blockchain Practice

Technical Architect | Jan 2020 – Sep 2021

Tech: Java, Spring Boot, Corda, Ethereum, Self-Sovereign Identity, Azure DevOps

- Led 3+ client-specific blockchain POCs spanning CBDC, supply chain track-and-trace, and digital identity.
- Partnered closely with the PreSales team on idea generation and product improvements.

MYRIAD DQM Platform | Credit Suisse

Technical Lead | Jul 2015 – Dec 2019

Tech: Java, Spring, Oracle CEP, PL/SQL, Unix

- Partnered with Business and IT teams to translate regulatory requirements and support FSD preparation.
- Designed and architected regulatory program solutions using UML, overseeing development through to production release.
- Resolved technical issues across development and testing phases (SIT/UAT/OAT); mentored new team members and led code reviews, integration, and component testing.

ESR Automation using Oracle 11g FMW | NeuStar

Technical Lead | Jul 2013 – Jul 2015

Tech: Oracle SOA Suite 11g, Oracle WebLogic Server, Java, J2EE, PL/SQL, Web Services, Oracle BPEL, XML, XSLT, Unix

- Built a Number Porting platform supporting wireless-to-wireless number porting.
- Defined orchestration workflows using Oracle FMW (BPEL) for core number-porting business processes.
- Owned release management and client communication for the engagement.
